

Ingolf Cedra

Ingolf Cedra was born in the area of Dresden, Germany, in 1970. He is married and father of four children. Since 2014, he has been Managing Director of the HÜBNER Group, now together with Uwe Bittroff, Kai Mentel, Nora Oberländer and Claus Schäfer. Within the General Management, Ingolf Cedra is responsible for the business divisions Material Solutions, Photonics, and Research & Development.

Ingolf Cedra has been General Manager of the HÜBNER Group since 2014. After studying Mechanical Engineering/Process Engineering at the Technical University of Dresden, he joined the globally active VOITH Group in 1997. There he held various positions at different sites and in different divisions, most recently as General Manager for different market and product segments - first in the automation business and most recently for coupling systems for the railroad industry. Since joining the HÜBNER Group, he has been responsible for research and development activities, including the newly founded "New Technologies" division, which ultimately gave rise to the new HÜBNER Photonics division in 2016. In 2018, he also assumed responsibility for the former Rubber, Polyurethane, and Plastics divisions as well as for the Windows product line and PolymerTechnik Ortrand GmbH (PTO) to establish the new Material Solutions division as part of the consolidation in 2019.

In parallel to his role as General Manager at Group level, Ingolf Cedra is also responsible for the management of various HÜBNER affiliated companies, including HÜBNER Hungary (H-Kft), HÜBNER Turkey (HTR), and PolymerTechnik Ortrand GmbH (PTO). He is also a company representative at various institutions such as the University of Kassel as well as the European School of Management and Technology (ESMT) in Berlin.
