

Nora Oberländer

Nora Oberländer was born in Berlin, Germany, in 1994. She has been a Managing Director of the HÜBNER Group since March 2025, together with Uwe Bittroff, Ingolf Cedra, Kai Mentel and Claus Schäfer. Within the company's General Management, Nora Oberländer is responsible for the areas of Strategy and Digitalization.

Nora Oberländer is the great-granddaughter of Kurt Hübner, who founded the company in 1946. She has been involved with HÜBNER business operations since 2025. Previously she served as a trustee on the HÜBNER Group Advisory Board since 2014 as well as on the Advisory Board of the HÜBNER and Kennedy Foundation gGmbH.

Nora Oberländer is an industrial engineer (mechanical engineering/energy technology) and studied at the Technical University Berlin, as well as in Sweden and Singapore. After completing her studies, she worked in various start-up companies in the mobility and hydrogen industries. Immediately before joining the HÜBNER Group's General Management, she was Head of Business Development at STOFF2 GmbH in Berlin, which produces electrolyzers for the production of green hydrogen.
