

High-Performance GRP Components

Everything from a single source – from development to assembly

- In house manufacturing and assembly
- Wide range of manufacturing technologies
- In house painting – quality, speed & full process control
- Development and engineering expertise

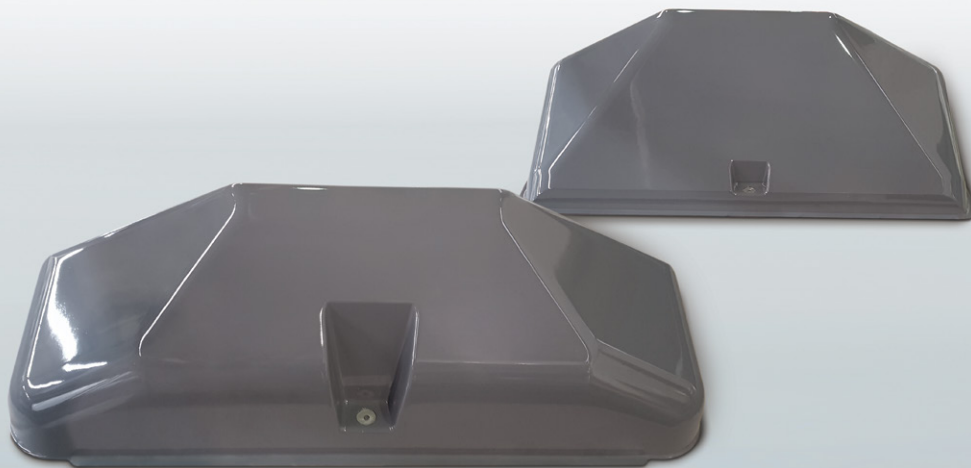

High-Performance GRP Components

GRP Portfolio

- Hoods including locks and hinges
- Brackets
- Pillar cladding with built-in electronics
- Seat boxes
- Door pillars
- Cab interiors
- Dashboards
- Front-ends

Benefits

- **Wide Range of GRP Technologies:**
The right process for every component – tailored to your needs
- **One Source. One Complete Solution:**
From engineering to painting to assembly – fully in-house
- **Certified Quality and Safety:**
ISO standards and bonding expertise you can trust
- **Flexible. Fast. Customer-Focused:**
Ideal for customized components and quick realization

As an established GRP supplier to the rail industry, **Gummi-Welz Poland (GWP)**, the specialized partner within the HÜBNER Group, provides both extensive technological expertise and the certifications required for the OEM market.

Certified Quality and Safety

- DIN EN ISO 9001:2015
- DIN EN ISO 14001:2015
- EN 17460/A1 Bonding
- EN 15085 Welded parts purchasing

GRP Competences

Development

- 2D- and 3D- modeling, product development abilities

Modelling

- Reverse engineering
- Manual and CNC milling (outsourced)

Mould Making

- Aluminum-plastic back casting
- Tooling resins

Spare Parts

- Spare parts manufacturing

Manufacturing

- RTM- & LRTM
- Vacuum-injections
- Hand lamination
- Spray application
- Foam resin process

Other Processes

- Painting
- Assembly and finishing
- Bonding
- Cutting (manual)
