

HÜBNER IS PART OF YOUR TEAM

ARTICULATION SYSTEMS, FOLDING BELLOWS, RAMPS & LIFTS

KEEPING YOUR BUSES RUNNING THROUGHOUT THE ENTIRE LIFE CYCLE

TRAINING

Having well-trained personnel is the key to ensuring fast and professional responses for everyday service requirements.

We offer:

- Customized training courses for service personnel perfectly matched to your requirements
- Practical maintenance or repairs for bus articulation and gangway systems
- Training for ramp & lift systems
- HÜBNER is there as part of your team

ON-SITE REPAIRS

Repairs, maintenance and refurbishment – directly on site at your facilities or in our factory. We offer:

- Economical servicing on site as well as factory-based repair of your HÜBNER vehicle components
- Full check of the complete gangway system, including articulations, folding bellows and power connection systems

ADVICE AND SUPPORT

Your goal is our mission: To ensure high availability and reliable performance of your vehicles now and for many years to come.

- Take advantage of our comprehensive support on all aspects of your spare parts management
- Repairs for folding bellows or bus articulations
- Customized training offerings for your fleet and equipment
- Remote or on-site support

SPARE PARTS

Use HÜBNER Original Spare Parts for optimal performance and durability of your bus articulation systems.

- Our precisely matched, installation-optimized components ensure maximum vehicle availability
- Original Spare Parts – thoroughly tested, precisely fitted, and highly reliable
- Quick and accurate parts identification
- Fast delivery
- High availability

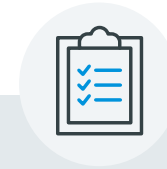

Spare parts dispatch
within 24 hours

MAINTENANCE

For smooth operations and maximum service life for all your articulation systems.

- Our highly experienced HÜBNER service technicians can manage the complete maintenance of your bus articulation systems
- Inspection, adjustment, and, if necessary, replacement of mechanical, electrical, and hydraulic components
- Lubrication of all bearings and cleaning of all associated components
- Comprehensive documentation

INSPECTION

Component assessment – for proactive services and less downtime.

- We carry out a targeted inspection of your components for current function and condition – providing a reliable basis for efficient maintenance, reduced costs and maximum vehicle availability
- Condition assessment of components
- Checking of mechanical function
- Checking of articulation control unit
- Determination of repair and maintenance requirements

HUBLink

**THE DIGITAL CUSTOMER PORTAL.
