

Apply now for the 2025 training year

“Gangway to professional future”: HÜBNER welcomes 18 junior employees

Kassel (August 27 2024). HÜBNER is entering the 2024 training year with two firsts: For the first time, an IT specialist will be trained in the field of application development. Also under contract for the first time is a retrainee who is now completing retraining as an industrial clerk. A total of 15 trainees in the industrial-technical and commercial sectors, two dual students in mechanical engineering and a one-year technical college intern have started at HÜBNER.

New approaches to training

“Accompanying young people on their way to their professional future has been part of the DNA of our corporate culture for years,” says **HÜBNER Managing Director Claus Schäfer**. *“We are breaking new ground in recruiting skilled workers and have further expanded our training capacities in the IT sector.”* Since last year, HÜBNER has already had an apprentice IT specialist for system integration and a clerk for digitization management. A total of around 50 trainees currently work at HÜBNER’s headquarters in Kassel.

At the start, the new trainees were offered a wide-ranging program in a one-week introductory workshop. This included an introduction to the company’s history, values and culture of HÜBNER as well as practical tips for everyday life in the company, but also the first steps in new IT systems with which the trainees regularly work on their personal laptops.

Training at HÜBNER means a lot of variety

“Above all, training at HÜBNER means a lot of variety – with insights into the numerous different areas of the company. This includes not only the content of the respective apprenticeship, but also valuable experience gained in the context of internships abroad,” summarized **Susanne Fülling, HR Officer at HÜBNER**. *“We are enthusiastic about the energy and commitment of our new trainees and look forward to supporting them on their way.”*

After the introductory workshop, the junior employees will start their training and will gain further, intensive insights in the coming weeks in order to be optimally prepared for their new tasks.

HÜBNER is looking for committed trainees for 2025

For the 2025 training year, new applicants are already being sought in the fields of IT, metalworking, and commercial professions, as well as dual students for the industrial engineering degree program. In the HÜBNER career

portal, interested parties can upload their applications directly in the “All Jobs” section: <https://jobs.hubner-group.com>
