

Change in General Management

Ingolf Cedra is taking on new responsibilities outside HÜBNER Group

Kassel (28 January 2026). Change in the management of the HÜBNER Group: Ingolf Cedra will leave the company at his own request on 30 June 2026 and take on a new professional challenge.

Thanks for many years of successful commitment

Owner Reinhard Hübner regrets Ingolf Cedra's personal decision and thanks him for his many years of commitment: *"Ingolf Cedra has played a key role in shaping the growth and successful further development of the HÜBNER Group over the past twelve years. Under his responsibility, the Material Solutions business division and especially the still young Photonics business division have established themselves internationally in the high-tech sector – with sophisticated laser technologies that are now used in quantum technologies, holography and cancer diagnostics, among other things. We thank him for this from the bottom of our hearts. We wish him all the best for his future personal and professional career."*

Ingolf Cedra (55) has been Managing Director of the HÜBNER Group since 2014. Within the General Management, which he forms together with Uwe Bittroff, Kai Mentel, Nora Oberländer and Claus Schäfer, he is responsible for the business divisions Material Solutions, Photonics, and Research & Development.

HÜBNER Group

Mobility. Materials. Photonics. | united by passion.

The HÜBNER Group is a global provider of systems and solutions for the mobility sector, the manufacturing industry, and for the life sciences and research applications. With its four divisions **Mobility Rail**, **Mobility Rail**, **Material Solutions** and **Photonics**, HÜBNER is setting standards worldwide and covers a broad spectrum of products and services.

As the world's leading manufacturer of articulation and gangway systems for buses and railway vehicles, HÜBNER ensures safe and flexible connections. In addition, the Group of affiliated companies is a leading developer of chassis technology, cockpit display solutions, airport technology as well as door safety and sealing systems. The company is also an internationally recognized specialist for sophisticated solutions making use of elastomers such as silicone and EPDM, Polyurethanes as well as for insulation and composite materials and industrial textiles such as coated fabrics. With advanced laser technology products, HÜBNER is successfully active in pioneering fields such as holography, cancer diagnostics, quantum physics and spectroscopy.

In 2024, the company generated sales of about €476 million with a staff of approximately 3,500 employees. In addition to its headquarters in Kassel, Germany, HÜBNER is operating at approximately 30 locations around the world.
